

At our Themis legacy site in Vienna, MSD is developing recombinant measles virus strains as heterologous vaccine carries and for cancer immunotherapies.

Our Medical Affairs team engages with industry leaders and medical experts to share the scientific value of our current and pipeline products. We connect, communicate and train internal employees to ensure we all understand the science behind our medicine.

The Regional Director Medical Affairs (RDMA) is responsible for helping to create and drive execution of scientific and medical affairs plans for their assigned Therapy Areas (TA) in their assigned region. They are important members of regional cross-functional teams, alongside regional colleagues from other functions such as Commercial, Center of Real-World Evidence (CORE), Policy and Market Access. They conduct scientific exchange with scientific leaders in their region and globally. This is a regionally based position (i.e., residing in one of the affiliates of the region or regional hub) in our Company's Research & Development Division's Global Medical Affairs (GMA).

## ***Regional Director Medical Affairs (m/f/d)***

---

### **Primary Responsibilities:**

- Supports country Research & Development Division's GMA staff to execute the annual scientific & medical plan for their assigned TA.
  - Co-chairs the Regional Medical Affairs Team to ensure execution of agreed medical tactics and leverage best practices.
  - Ensures scientific exchange is aligned with the global scientific communications platform.
  - Partners with regional Commercial, regional Center of Real-World Evidence (CORE), regional Policy and regional Market Access to drive development and execution of region plans.
  - Consolidates actionable medical insights from countries in their region.
  - Engages with scientific leaders and other key stakeholders (therapeutic guideline committees, payers, public groups, government officials, medical societies) from their region.
  - Supports, as regional TA expert, staff from our Company's affiliates in their engagement with their national scientific leaders.
  - Organizes regional expert input events, including Advisory Boards and Expert Input Forums, to help inform our Company's scientific research, product development and commercial strategies.
  - Organizes regional symposia and educational meetings.
  - Supports countries with the development of local data generation study concepts and protocols.
  - Reviews investigator-initiated study proposals prior to headquarters submission (ex-United States of America)
  - Manages regional programs (patient support, educational or risk management) to support appropriate and safe utilization of our Company's medicines.
- 

### **Education Minimum Requirements:**

- MD, PhD or PharmD (MD preferred) and recognized medical expertise in the therapy area

**Required Experience and Skills:**

- Five years' experience in country/region Medical Affairs.
- Strong prioritization and decision-making skills.
- In a matrix environment, able to effectively collaborate with partners across divisions.
- Excellent interpersonal, analytical, communication (written as well as oral), in addition to results-oriented project management skills.

**Preferred Experience and Skills:**

- Scientific leadership and other key stakeholders (payers, public groups, government officials, medical professional organizations) in the assigned therapeutic area.

---
